

ALPENA CEMENT PLANT

FACT SHEET

WHO WE ARE

The Michigan located Alpena cement plant began production in 1907. The facility produces cement that serves customers throughout the Midwest and Ontario via the Great Lakes vessels and a series of cement terminals.

- More than 200 employees
- Annual production capacity of 2.4 million metric tons, producing low-carbon OneCem® PLC, Type I/II, Type III, Masonry Type N and Type S cements
- Safety-first culture, spotlighting the importance of safe behaviors and a safety mindset is constantly emphasized as the highest priority, with the goal of zero harm to people
- Community-focused approach, supporting local organizations and events, such as the United Way of Northeastern Michigan, Habitat for Humanity of Northeast Michigan and the Alpena 4th of July Parade

ENVIRONMENTAL COMMITMENT

Environmental sustainability initiatives include:

- Investing over \$100,000,000 in eco-friendly technologies over the last fifteen years
- Balancing traditional and alternative fuels, such as used auto tires and other recycled materials, to achieve sustainable development
- Reducing emissions from CO₂, sulfur and nitrogen

BUILDING PROGRESS FOR PEOPLE AND PLANET

As part of Holcim US, we play an essential role in accelerating our world's transition to a net zero and inclusive future. Together, we all stand for the following:

- Making cities greener
- Empowering society with smarter infrastructure
- Becoming a net zero company
- Improving living standards for all
- Building more with less
